**On a
typical hot day,
the air leaving a
WayCool®
is 20°F cooler.**

WAYCOOL®

The best portable evaporative cooler available!

The WayCool's® unique design dramatically out-performs all other portable evaporative coolers by moving air farther with greater cool air output, smaller size, lower cost and better looks.

- Two-speed, quiet blower moves air up to 100 feet with great air velocity.
- Oscillating option allows greater coverage - like no other evaporative cooler.
- High efficiency evaporative cooling pads on all four sides.
- High impact ABS plastic with UV protection.
- *Low operating costs - less than 50 cents a day!*
- Ease of maintenance and simple design for long lasting use.
- Continuous fill or reservoir for stand-alone operation.
- Optional automatic shut-off. When water drops to a low level, the pump shuts-off and the light comes on. (Can be purchased and installed separately.)
- Optional WayCool® duct kits - Allows cool air to be delivered right where it's needed!

Oscillating WayCool® Patent Pending

You can purchase our WayCool® with an oscillating spout. With an arc of 110°, the oscillating WayCool® distributes cool air to an even larger area. Other coolers require you to move the entire unit to change the direction of the air flow.

WayCool Comfort

EWAYCOOLE®

New options for the WayCool®

Easy Fill & Water Level Gauge are optional on all one horsepower regular and oscillating models. Fill cap removes easily to manual fill your WayCool®. Water level gauge features an easy-to-read window to monitor water level.

Pneumatic Wheels are optional on all models except Designated Hazardous Location model. Pneumatic wheels are designed for easy rolling on rough or uneven surfaces. Kit features two locking and two non-locking wheels.

Water conditioner and cleaner available.

Designated Hazardous Location Unit

Certified for Class I, Division 2, Group D & Class II, Groups F & G & Class III Hazardous (Classified) Locations

Class I: Hazardous Location is one in which flammable gases or vapors may be present in the air in sufficient quantities to be explosive or ignitable.

Class II: Are those areas made hazardous by the presence of combustible dust.

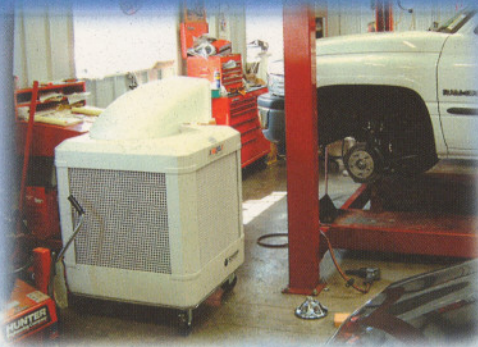

Class III: Are areas where there are easily-ignitable fibers or flyings present, due to the types of materials being handled, stored, or processed.

Division 2: Not normally present in an explosive concentration (but may accidentally exist).

Testing/Certifications Standards: Electrical Equipment for use in Class I and Class II, Division 2 and Class III Hazardous (Classified) Locations.

Use WayCool® portable evaporative cooling fans to cool almost any area - indoor or out!
